# THE Kennedy Gardens

Midland, Michigan

The Finest in Gladiolus, Dahlias,  
Iris and Peonies

# Gladiolus

Although we tested a large number of new varieties last season, our present list is shorter than the several which have proceeded it. We have discarded many new varieties, not because they are poor, but because we are not satisfied to grow and sell those which are merely good; it is our intent to supply only the best both in variety and quality of bulb. Had we retained all of those we tested, this list would be almost seven times its present length.

We see no merit in lengthy lists which owe their length to a large number of poor and mediocre varieties and which tend to confuse the purchaser. It is true that we like to measure progress by the number of worth-while novelties we can supply. With the flood of mediocre introductions which are placed on the market each year, we feel that progress might more truly be indicated by our discards. To throw away a bulb that may represent an actual outlay of five or ten dollars or more hurts our pocketbook but protects you. The sum total of our discards has mounted to a figure of such size that we do not like to contemplate it. We refuse to list a variety merely because it is high priced, extensively advertised, or a prize winner, when our field tests indicate that it will be a disappointment to our customers.

The drought of the past Summer has made the evaluation of new varieties very difficult, especially those imported from Scotland, but we judged as well as we could under the circumstances.

Each year we grow thousands of new seedlings from hand-pollinated seed of rare varieties. During the past Summer we had some exceptional blooms, much better than many of the varieties we list, but no seedlings will be introduced until we are certain this superiority will continue.

Our ability to select good varieties has been demonstrated to some extent by our large winnings against keen competition at the Michigan State Gladiolus show for the past three years. This show is well worth your attendance as it is here that the premiere display of many of the fine Vaughan seedlings is made. The Vaughan Seed Store and other growers from all parts of the State bring the finest of their blooms which represent the best originations from America, Europe, Australia and New Zealand. The result is a show which is not surpassed by any in the country.

The bulbs which we offer are of our own growing and it is not our intention to purchase for resale. We believe that few growers expend as much effort and money as we to keep stocks true to name and free from disease. We are unable to purchase bulbs of the quality we offer at any lower prices than those we quote.

An enormous quantity of badly mixed and diseased bulbs are sold every year to people who are more interested in price than they are in quality. Such stock not only brings disappointment at blooming time but frequently so infects the soil with disease that healthy bulbs planted in the same location another year will become diseased. We guarantee our stock to be true to name and free from disease.

All stock is offered subject to prior sale, and we reserve the right to withdraw a variety in order to retain sufficient for our own plantings. We do not substitute if sold out of a variety. The quality of our stock has brought unsolicited letters of praise from amateur and professional growers in all parts of the country.

**SIZE OF BULBS.** The standard sizes are employed in grading these bulbs according to their diameter. No. 1 bulbs are  $1\frac{1}{2}$  inches or more; No. 2 bulbs,  $1\frac{1}{4}$  to  $1\frac{1}{2}$  inches; No. 3, 1 inch to  $1\frac{1}{4}$  inches; No. 4,  $\frac{3}{4}$  inch to 1 inch; No. 5,  $\frac{1}{2}$  inch to  $\frac{3}{4}$  inch; No. 6,  $\frac{1}{2}$  inch or less. No. 1 and No. 2 bulbs produce the largest blooms; Nos. 3, 4 and 5 bulbs produce smaller blooms but give more bulblet increase and grow into large bulbs before harvest time. No. 6 bulbs of many varieties will frequently bloom if planted early and given special care.

**PRICE OF BULBS.** Single bulbs will be sold at  $\frac{1}{8}$  the price of ten unless otherwise listed; 25 bulbs at the 100 rate; 250 at the 1000 rate. No single item less than 5 cents. As an example of the method of arriving at the price of a single bulb consider the variety Golden Dream as an example; as 10 No. 1 bulbs are listed at \$1.00, one bulb would sell for  $\frac{1}{8}$  of \$1.00 or for 13 cents; one No. 2 for  $\frac{1}{8}$  of 90 cents or 11 cents; one No. 3 for  $\frac{1}{8}$  of 70 cents or 9 cents; one No. 5 for  $\frac{1}{8}$  of 45 cents or 6 cents.

**BULBLETS.** Where variety warrants, bulblets will be sold at 25 cents per package; the number of bulblets to be determined on the basis of the scarcity of the variety.

You will be treated liberally. In the last two columns bulblets are priced by 10, 100, 1000, quart, or peck as indicated by the next to the last column.

TERMS. No order accepted for less than \$1 except locally. Prices include delivery if order amounts to \$2. Cash with order up to \$5. A 25% deposit will hold larger orders until March 15th, balance before shipping, or bulbs will be forwarded by express collect.

KEY TO ORIGINATORS. The initial in parenthesis following the name of the variety indicates the originator. A.—Austin; B.—Bill; Br.—Briggs; Brt.—Brunelet of France; By.—Boynton; Bt.—Betscher; C.—Coleman; D.—Diener; E.—Errey of Australia; Es.—Ellis; F.—Fisher; Gf.—Groff of Canada; H.—Hoeg; K.—Kunderd; Kf.—Kirchoff; Kp.—Kemp; M.—Metzner; Ma.—Mair; Mr.—Miller; L.—Lemoine; P.—Prestgard; Pf.—Pfitzer of Germany; S.—Salbach; U. B.—United Bulb Co.; V.—Vilmorin of France.

## Gladiolus in Mixture

Many people desire to purchase a collection which will produce fine blooms in a wide range of color, but they are not interested in labeling each variety and keeping it separate. We do not grow mixtures, but on receipt of orders your collection is made up by selecting bulbs from the separately stored varieties in this list. We can omit or include colors to comply with your wishes.

We have had many compliments on these mixtures and believe that they are not excelled by those of any grower.

Bulbs Priced per 100

	No.1	No.2	No.3	No.4	No.5	No.6
SELECTED MIXTURE	\$3.60	\$3.20	\$3.00	\$2.00	\$1.25	\$ .75
EXTRA SELECTED MIXTURE	5.00	4.50	4.00	2.75	1.75	1.00

---

## Delphinium Seed

For several years we have been growing delphinium from seed of named varieties which we have purchased from the greatest originators in Europe and America. This year we have again saved seed from carefully selected plants which have been grown at a distance from unselected plants in order to insure a better quality of seed. This is offered at \$.75 per package of 200 seeds.

---

## Iris

The proper time to transplant iris is during the months of July, August and September, although they may also be moved in the Spring. We grow about 175 varieties which we have purchased in France, England and America. For Spring shipment we are offering only the following varieties: IRIS KING—yellow; LOH-ENGRIN—light mauve; MRS. NEUBRUNNER—deep yellow; PERFECTION—light lavender violet; P. VICTORIA LOUISE—primrose yellow and crimson; RHEIN NIXE—white and violet; SHERWIN WRIGHT—deep yellow; VIOLACEA GRANDIFLORA—violet blue; WINDHAM—pale pink; WYOMISSING—creamy white and rose.

PRICE OF ANY OF ABOVE—\$1.50 per 10 rhizomes of any one variety.

# Exhibition Dahlias

We have grown the large type of dahlias for almost ten years, and from our extensive tests are offering only those varieties which grow well in our climate. With the exception of Little Jewell and Mr. C. H. Dresselhuys they will grow to a diameter of 7 inches or more under field culture. With special attention some of them have produced 11 inch blooms. They all possess long stems suitable for cutting.

Prices are for single tubers delivered in good growing condition. If unsatisfactory, return at once and stock will be replaced or money refunded.
